

POTTERS ARE LEADING SUPPLIERS OF CAGE FREE POULTRY EQUIPMENT

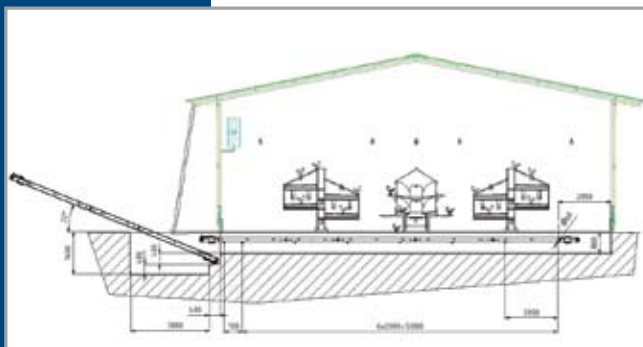

Heavy duty drive sets ensure long-term reliability

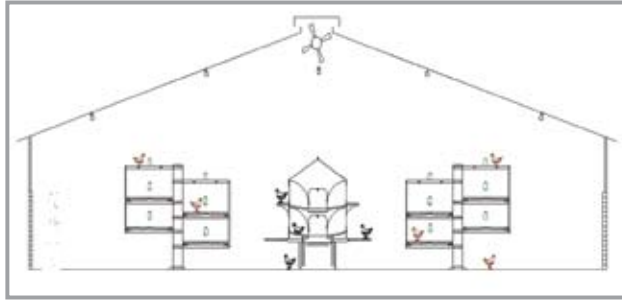

The Potters Poultry multi-tier aviary system is different. Why? It is designed by farmers to be used by farmers. It is designed with easy bird management as a priority. It is the most open system available making it better to see and manage the hens.

A fully integrated system packed with features:

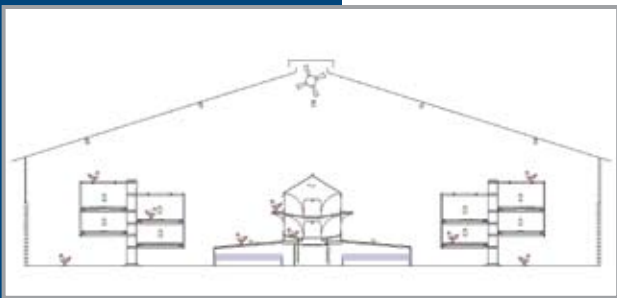

- A simple support system with very little of the structure fixed to the floor - meaning easy cleaning.
- An endlessly adaptable system to suit any building.
- Lighting available on all levels to minimise floor eggs.
- Minimal distances between tiers to reduce flight requirements of hens, therefore reducing injury.
- Choice of belt numbers to suit layout design and building dimensions.
- Ideally suited to new, refurb or conversion projects.
- All necessary perching provided within the system.
- Supplied as part of a complete package to provide a turnkey project.
- Supplied by a UK company with 25 years experience with manure belts and nesting within Free Range and Barn.

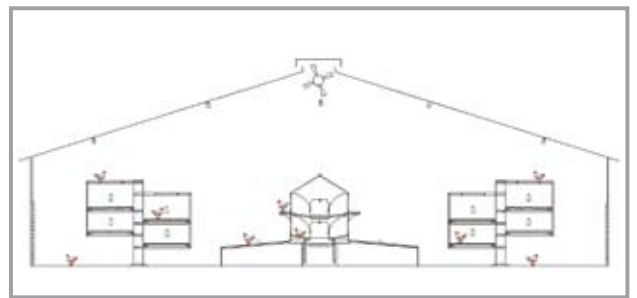

Flexible modular systems mean any poultry house can have aviary systems installed

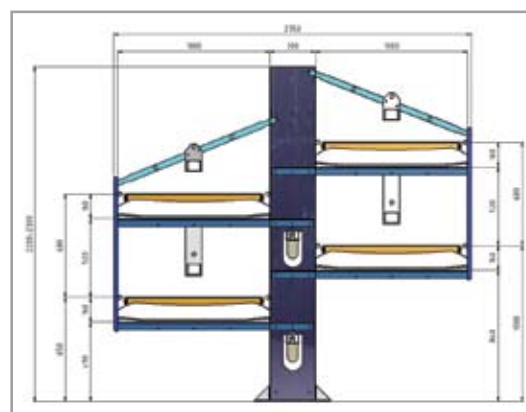

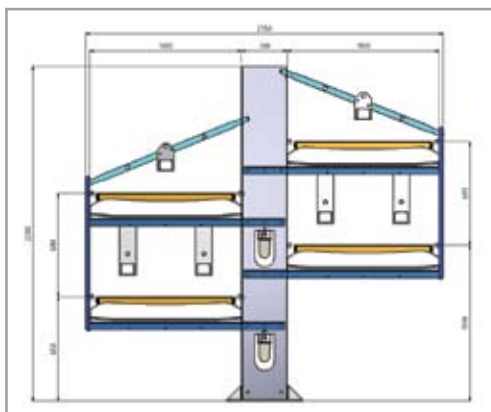

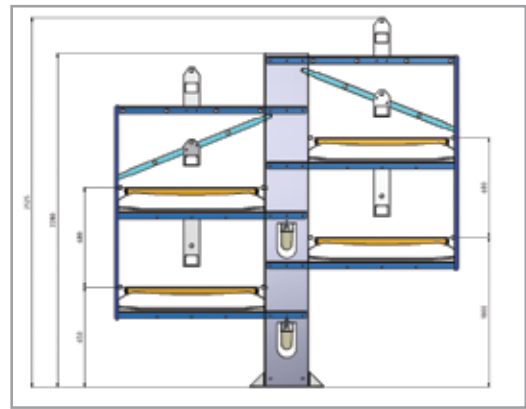

Standard design - maximise stocking density

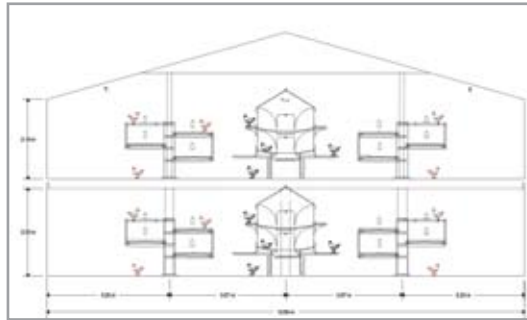

Combination design - with extra manure belts

Combination design - with manure pit

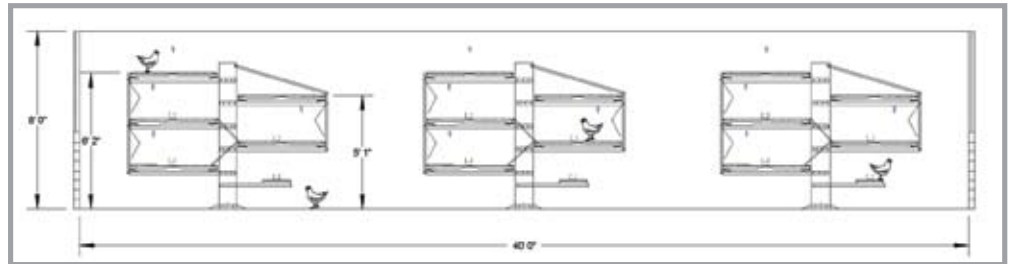

Cage house conversions

Single level or high rise buildings easily converted for cage-free production.

Flexible design layout solutions for cage house conversions

Aviary rearing

Our Aviary Rearing System is designed for the rearing of commercial layers for aviary laying production systems.

The system has been designed for the even rearing of pullets and the easy working environment of the poultry farmer.

Specification levels are very high including:-

- 5 tier rearing with 2 brooding levels
- Easy bird movement between levels
- Hinged front doors for farmer access to birds
- All birds are easily visible
- Designed to ease bird movement between tiers.
- Clean and hygienic manure removal with belts.
- Designed for easy cleaning and washing
- The strong single leg design makes it easy for birds to move around the building.
- Designed for easy catching of the birds
